

PRESS RELEASE

Robotize and Nord Modules Join Forces to Launch Game-Changing AMR Solution

Copenhagen, Denmark - 21 October 2025 - Two automation powerhouses are teaming up to revolutionize material handling. Robotize, the innovator behind the GoPal® Autonomous Mobile Robot (AMR) series, and Nord Modules, the expert in modular transfer solutions, are proud to announce a new strategic partnership and the launch of their first joint product: the GoPal® P35 AMR powered by the Nord Quick Mover 260 module.

This dynamic duo brings the best of both worlds together: Robotize's cutting-edge AMR technology and Nord Modules' intelligent, plug-and-play transfer modules. The result? A sleek, smart, and powerful solution that takes intralogistics automation to the next level.

The GoPal P35 with the Nord Quick Mover 260 can pick up, transport and deliver payloads up to 260 kg (570 lbs) from conveyors, lifters, and workstations, while safely navigating busy production and warehouse environments. Together, they create a ready-to-deploy solution that slashes manual handling, eliminates workflow bottlenecks, and supercharges productivity - all while being incredibly easy to integrate and scale.

"This partnership is about bringing customers a smarter, faster, and more flexible way to move goods," said Roberto Giannetti, Global VP Sales & Marketing at Robotize. "With the GoPal P35 and the Nord Quick Mover 260, we're making automation simpler and more accessible than ever."

Erik Mønster, CEO at Nord Modules added: "We're combining forces to deliver a product that doesn't just improve efficiency, it transforms the entire workflow. It's a game-changer for factories, warehouses, and logistics hubs."

The GoPal P35 with Nord Quick Mover 260 is more than a product - it is the first milestone in a bold new partnership between Robotize and Nord Modules, with more innovations already on the horizon. For more information, please visit [Nord Modules' website for Robotize solutions](#).

About Nord Modules

Nord Modules is a robotics company that develops, produces and sells top modules for mobile robots worldwide. Since 2017, Nord Modules have been on an exciting journey, where a wide range of products have been developed for and in collaboration with major robot manufacturers. With innovative designs and high-quality products, Nord Modules are ready to help their customers, who are located all over the world, to optimize their internal logistics. Nord Modules currently have 30 employees and expect continued strong growth in the coming years. For more information, please visit www.nord-modules.com.

About Robotize

Robotize specializes in the design and manufacture of Autonomous Mobile Robots (AMRs) and related accessories for the fully automated and safe internal material transport within factories, warehouses and DCs. Our unique GoPal® AMR solution optimizes intralogistics by automatically and safely picking up, transporting, and delivering payloads weighing up to 1200 kg (2640 lbs). Our GoPal® AMR solution is deployed across various industries, such as automotive, pharmaceutical and food and beverage. Robotize has its global headquarters in Copenhagen, Denmark, and its North American office in Troy, MI, USA. For more information, please visit www.robotize.com.
